# Features

- 

Excellent Systems products can bear a weight of 2000kg.
- 

The products can handle temperatures down to -50°C and up to 100°C.
- 

The surfaces are self-draining and with SureGrip inserted are highly slip resistant.
- 

Test have shown that the products are harmless under combustion with no toxic subsances released.
- 

All products are acid-resistant, corrosion-free and resistant to household detergents.

## Environment

All products are manufactured from the environmentally friendly material Polyethylene (PE), the same material used on the inside of a milk carton.

**100%**

Non-toxic  
PVC-free  
Food grade  
Odourless  
Rebuildable  
Recyclable

# Gradients

Ramp with platform and 10cm kerb, inclination 1:14. Great for manual wheelchairs.

Ramp type I, inclination 1:7. Flat surface, great for electric wheelchairs.

Ramp type II, inclination 1:14. Flat surface, great for wheelchairs, forklifts etc.

Ramp type II with platform and 5cm kerb, inclination 1:14. Flat surface.

Incorporating SureGrip at 50% coverage, to provide a highly slip resistant surface. It is always recommended in outdoor ramps.

Corner ramps provide access from every direction. They have no edges to trip over and can be driven on by vehicles.

# Gradients

Excellent Systems is an award winning range of products, which all fit together and combine to form ramps, platforms, floors etc. The system is easily assembled with a range of locks and can be disassembled and rebuilt into different shapes and sizes, without specialist tools.

When it comes to ramps, we have created 4 categories which relate to key gradients that can be achieved: 1:7, 1:14, 1:20. We have marked each one with a colour; Use **BLUE** ramps with other components in the **BLUE** series, **GREEN** ramps with other components in the **GREEN** series and **ORANGE** ramps with other components in the **ORANGE** series. The guidance below provides some typical configurations.

## Gradient 1:7 | 14.5%

Recommended use: Threshold ramps when limited space is available, especially suitable when assisted.

## Gradient 1:14 | 7.5%

Recommended use: Ramps with small “rest platforms” - especially suitable for hand-driven wheelchairs.

Recommended use: Larger ramps when space is available - especially suitable for electric wheelchair.

# Gradients

## Gradient 1:20 | 5%

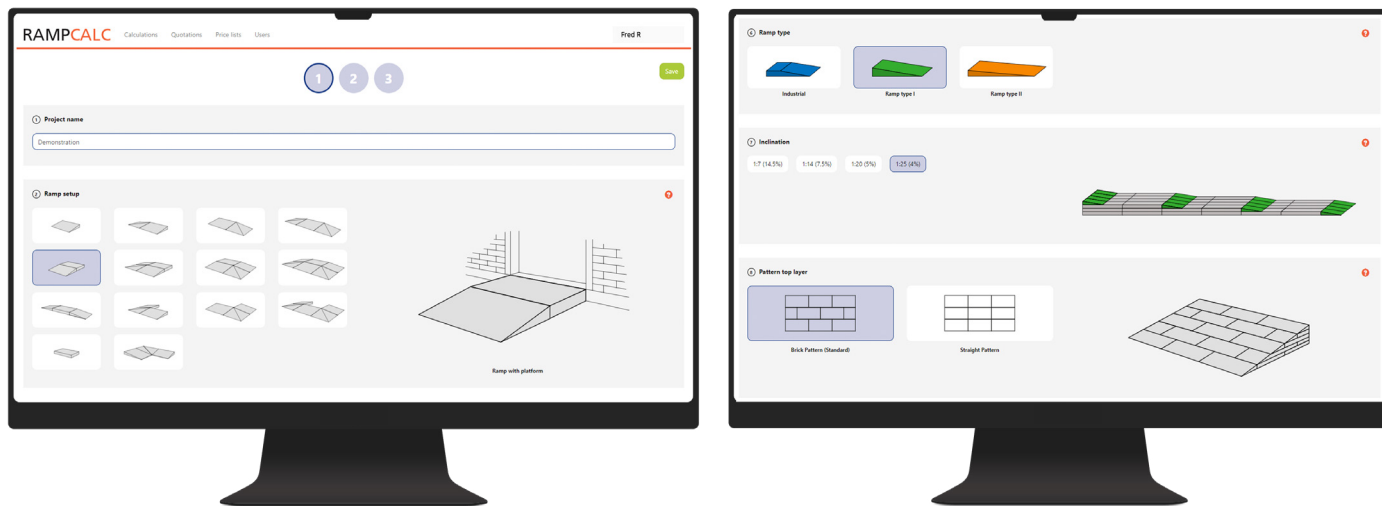

Recommended use: Create larger, shallower ramps when space is available - suited for all users whether assisted or not.

# RampCalc - The Ramp Calculator

RampCalc is used to calculate all types of Excellent Systems ramps, quickly and easily. It will generate of list of all components required together with a downloadable installation guide.

Please register your interest at [info@easiaccess.co.uk](mailto:info@easiaccess.co.uk).

# Surfaces, Infill and Hard tile

## Surfaces

### Holes

The standard **surface with holes** has a slip resistant surface and is self-draining. Dirt will be collected inside the ramp, whereby it can be collected and easily cleaned.

### SureGrip

The **surface with SureGrip** tiles inserted at 50% coverage is recommended mainly for outdoor use and increases the slip resistance. At 100% coverage SureGrip is well suited to all footwear, especially pointed heels.

Available in Yellow, SureGrip can also be used as a visual indication.

SureGrip = S

### No holes

The standard **surface with No holes** is mainly suitable for indoor use. If there is a chance things may get stuck, or you wouldn't want anything to fall through the holes, this is a great solution.

Most tiles are available in this surface.

Please contact us if you require this option, which may be subject to a minimum order quantity and leadtime.

## Infill

### Infill tile

Manufactured from regenerated materials, with fixed locks on 2 sides and reduced surface area, these help to reduce the cost of building a solution when placed underneath the top surface.

N.B. There is extra room for C-Locks on all sides.

### Six-Pack Infill tile

Equivalent of 6 full tiles, stacked side by side, 3 layers high. Designed to minimise materials and be quicker to install, therefore reducing the cost when building larger ramps and platforms. Placed on the lower layers.

N.B. Produced from partly new and regenerated materials, meaning the look can vary.

## Hard tile

### Hard tile

Most tiles are available in a 'Hard' version which is produced from a higher density material. These are well suited to carpeted surfaces to minimise movement and reduce unwanted 'flex'. Please speak to a member of our technical team in these instances who can better advise on the most suitable product.

Please contact us if you require this option, which may be subject to a minimum order quantity and leadtime.

# Colours

The product range is primarily available off-the-shelf in Grey with a limited availability of Yellow and Black components. Other colours are available subject to a minimum order quantity, lead time and surcharge. Please contact us for more information.

For the purposes of ordering, the number at the end of a product code (after the hyphen "-") refers to its colour. If no hyphen is shown, you can assume that it will be the standard Grey.

EXAMPLE: the number 123456-3 indicates an item in the colour "Yellow". Please use these colour codes when you order.

### Standard colour

Grey xxxxx-2

### Other colours

Yellow xxxxx-3

Black xxxxx-7

### Special colours

Contact us for further information.

# Assembly

How to...

## C-Lock

**C-Lock connects:** Horizontal connections | **Tool:** Rubber mallet

Secures ramps and tiles horizontally.

C-Lock is easy to mount and dismount by hand.

A rubber mallet makes connecting all tiles and ramps even easier.

# Assembly

How to...

## R-Lock

**R-Lock connects:** 1 tile + 1 ramp | **Tool:** Rubber mallet

Connects ramps on top of tiles. Used on the inclined surfaces.

## T-Lock

**T-Lock connects:** 1 tile + 1 tile, 1 tile + ramp | **Tool:** Rubber mallet

Connects two layers of tiles on top of each other.

# Assembly

How to...

## S-Lock

**S-Lock connects:** 1 SixPack + 2 layers of tiles, 3 layers of tiles | **Tool:** Rubber mallet

Connects three layers of tiles on top of each other.

## L-Lock

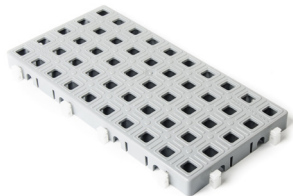

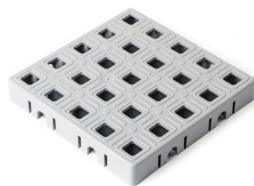

**L-Lock connects:** 5 tiles, 1 SixPack + 4 layers of tiles, 2 SixPacks + 1 tile | **Tool:** Rubber mallet

Connects five layers of tiles on top of each other.

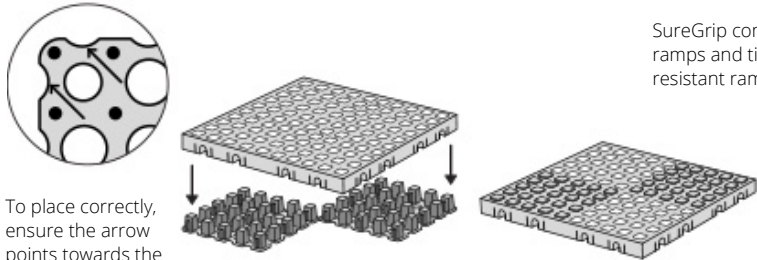

# Tiles

Full Tile	Half Tile	Quarter Tile	SureGrip Tile
12503 -	12510 -	12509 -	12830 -
<b>Dimensions:</b> Height: 18mm Width: 250mm Depth: 250mm	<b>Dimensions:</b> Height: 18mm Width: 250mm Depth: 125mm	<b>Dimensions:</b> Height: 18mm Width: 125mm Depth: 125mm	<b>Dimensions:</b> Height: 20mm Width: 116mm Depth: 116mm
			
<b>Use:</b> Flooring and ramps, build more than 2 layers high.	<b>Use:</b> Flooring and construction of ramps.	<b>Use:</b> Construction of stronger ramps in brick pattern.	<b>Use:</b> In conjunction with the Excellent tile to provide extra slip resistance.

### How to use SureGrip Tile

To place correctly, ensure the arrow points towards the centre of the tile.

### How to...

SureGrip combined with Excellent Systems ramps and tiles is probably the most slip resistant ramp system in the world!

# Ramp I Tiles

Ramp I Tile	Ramp I Half Tile	SureGrip Ramp I	Corner Ramp I Tile
12505 -	12511 -	12840 -	12507 -
<b>Dimensions:</b> Height: 18mm Width: 250mm Depth: 137mm	<b>Dimensions:</b> Height: 18mm Width: 137mm Depth: 137mm	<b>Dimensions:</b> Height: 20mm Width: 116mm Depth: 91mm	<b>Dimensions:</b> Height: 18mm Width: 137mm Depth: 137mm

<b>Available Colours:</b> - 7 Black	<b>Available Colours:</b> - 3 Yellow	<b>Available Colours:</b> - 7 Black

## Ramp II low inclination and level surface

With Ramp Type II it's possible to build ramps with low inclinations and level surfaces, specially suitable for electric wheelchairs.

# SixPack and Infill

## SixPack

15000

**Dimensions:**

Height: 54mm  
Width: 500mm  
Depth: 250mm

**Use:**

Raising ramps or flooring with more than 4 layers, where it is visible.

**Standard Colour:**

■ - 2 Grey

## Infill tile

12998 - 9

**Dimensions:**

Height: 18mm  
Width: 250mm  
Depth: 250mm

**Use:**

At the bottom or inside of ramp or raised flooring upto 3 layers, or on top of Six-Pack infill.

**Standard Colour:**

■ - 9 Slate

## SixPack Infill

15100 - 9

**Dimensions:**

Height: 54mm  
Width: 500mm  
Depth: 250mm

**Use:**

At the bottom or inside of ramp or raised flooring, with 3 layers or more.

**Standard Colour:**

■ - 9 Slate

# Locks

## T-Lock

12732 -

**Dimensions:**

Height: 35mm  
Width: 14mm  
Depth: 14mm

**Use:**

Connects 2 layers on top of each other.

**Standard Colour:**

■ - 2 Grey

**Available Colour:**

■ - 7 Black

## R-Lock

12742 -

**Dimensions:**

Height: 24mm  
Width: 14mm  
Depth: 14mm

**Use:**

Connects ramps on top of tiles. Is used on the inclined surfaces.

**Standard Colour:**

■ - 2 Grey

**Available Colour:**

■ - 7 Black

## S-Lock

15250

**Dimensions:**

Height: 51mm  
Width: 14mm  
Depth: 14mm

**Use:**

Connects 3 layers.

**Standard Colour:**

■ - Grey

## L-Lock

15200

**Dimensions:**

Height: 88mm  
Width: 14mm  
Depth: 14mm

**Use:**

Connects 5 layers (SixPack and Tiles).

**Standard Colour:**

■ - Grey

## SixPack Infill

The Excellent Systems Six-Pack Infill tile reduces the total price considerably when installing large ramps.

Variances may arise owing to the use of regenerated materials within Infill tiles. Where appearance is important consider using standard SixPack.

## Dismounting of Locks

Use a screwdriver and a rubber mallet to knock the head of the lock and loosen the layers.

# Fixings

## Expansion Guide

12695

### Dimensions:

Height: 9mm  
Width: 80mm  
Depth: 11mm

### Use:

To secure flooring and ramps outdoors. 2 nail-screw per expansion guide.

### Standard Colour:

■ - 2 Grey

## Stoppers

12500

### Dimensions:

Height: 14mm  
Dia: 9mm  
Dia: 14mm

### Use:

Under tiles and ramps, when there is a need for removing ramps quickly.

### Standard Colour:

■ - Black

## Mounting Pad

12690

### Dimensions:

Pad: 35 x 1mm  
Plug: 9 dia x 15mm

### Use:

To fix flooring and ramps indoors on wood, marble or tile. Easy to peel tape.

### Standard Colour:

■ - 2 Grey

# Adjustment

## Ramp Adjuster

12696

### Dimensions:

Height: 2 - 16mm  
Width: 250mm  
Depth: 200mm

### Use:

The Ramp Adjuster can be used to adjust the height from 2 to 16mm.

### Standard Colour:

■ - 2 Grey

## Adjustment Key

12527

### Dimensions:

Height: 0.5 - 3mm  
Width: 250mm  
Depth: 125mm

### Use:

The Adjustment Key can be used to fine tune the height from 0.5 to 3mm.

### Standard Colour:

■ - Grey

## K-Stop

17140

### Dimensions:

Dia: 40mm  
Dia: 32mm  
Height: 18mm

### Use:

For plugging both ends of the K-Tube.

### Standard Colour:

■ - Black

## K-Drill

17150

### Dimensions:

Flat Drill Dia: 30mm  
Drill Adapter Outer Dia: 50 x 100mm

### Use:

For drilling K-Tube ends to fit K-Stop.

### Standard Colour:

■ - Black

## Use the Mounting Pads

### How to...

## Using the Ramp Adjuster

### How to...

Avoid a trip hazard by making the ramp a precise height, using Ramp Adjusters providing fine tuning in 2mm increments.

# K-System

## K-Tube

17100

### Dimensions:

Outer-Dia: 40mm  
Inner-Dia: 24mm  
Length: 2000mm

### Use:

With K-Lock 1 and K-Lock 2 for kerb on ramps.

### Standard Colour:

■ - Grey

## K-Lock 1

17120

### Dimensions:

Height: 90mm  
Width: 54mm  
Depth: 125mm

### Use:

Connecting 1 layer of K-Tube on top of tiles and ramps. When used, kerb will be 50mm high.

### Standard Colour:

■ - Black

## K-Lock 2

17130

### Dimensions:

Height: 160mm  
Width: 54mm  
Depth: 125mm

### Use:

Connecting 2 layers of K-Tube on top of tiles and ramps. When used, kerb will be 100mm high.

### Standard Colour:

■ - Black

With K-Lock 1, the kerb will be 5cm high and with K-Lock 2 it will be 10cm.

K-Locks have to be mounted at least 2 holes from the edge of the ramp, to provide sufficient strength.

# K-System

## How to...

1

Saw the tubes to the required length.

3

Mount the K-Drill on the drill, press the tube into the K-Drill, and drill.

5

Use a rubber mallet to fasten the K-Locks. Making sure they are at least two holes from the edge of the ramp.

2

The tubes need to be drilled in both ends with the K-Drill to mount the K-Stops.

4

Now the tubes are ready to have the K-Stops mounted.

6

Drill holes through the K-Locks and the K-Tubes.

7

Fasten the tubes with a screw through both the K-Lock and the K-Tubes.

K-Lock 1  
Kerb height: 50mm.

K-Lock 2  
Kerb height: 100mm.

As well as Components, Easiaccess offer the full range of Excellent Systems products including Kits and QuickRamps. Making accessibility much easier with quick efficient access solutions.

Easiaccess provide a wide range of access solutions across the UK via our network of partners, from small threshold solutions to extensive modular metal ramp systems and portable equipment.
